GENERAL SCOPE OF BASIC ORDERING AGREEMENT

One major strength of reVision, Inc. is the unique experience of senior staff combining both the IT experience and the environmental domain. The unique blend of expertise allows reVision to bring state-of-the art, innovative IT solutions to the environmental industry in the areas of Environmental Data Management, Project Baseline Management and Tracking, Environmental Management Systems, GIS and 3D modeling.

reVision, Inc. is a certified Small Disadvantaged Business and 8(a), Information Technology (IT) and Environmental Engineering company, serving both the Federal Government and commercial clients. IT competencies include Network Management, Business Process Reengineering, Program Management, Software Engineering and Management, Database Design, Administration and Management. reVision provides innovative and feasible solutions, which meet clients' business and operational needs. reVision's competencies include, Software Engineering and Management, Network Management, Data Management and User Support.

reVision's Environmental Division provides Project Management and Technical Services in connection with characterization and remediation of contaminated sites. Our experienced staff has first hand experience with a variety of remediation technologies and state of-the-art data management and GIS.

ReVision offers the following services:

NETWORK MANAGEMENT

reVision's Network Management experts have extensive experience in multi-platform network support and implementation, with services that include:

- LAN/MAN/WAN Technical Support
- Office Automation
- HW/SW Acquisition
- Information/Network Security
- /Network Administration
- Configuration Management
- Testing, Verification, & Validation
- Customer Support/Help Desk
- System

BUSINESS PROCESS REENGINEERING

reVision's highly qualified consultants perform all activities involved in helping any organization improve its workflows through Business Process redesign, and aligning Information Technology infrastructures with business missions, goals and objectives. These activities include:

- Developing "As-Is" and "To-Be" models of Business Processes

- Technical Staff and Subject Matter Expertise
- Training Development & Instruction
- Studies & Analyses
- Testing and Quality Assurance
- Documentation Management
- Configuration Management

SOFTWARE ENGINEERING AND MANAGEMENT

reVision's Software Engineering and Management Team helps translate broad conceptual user requirements, from various functional management areas, into the most modern information technology systems. Areas of expertise include:

- Analysis, Assessment, and Planning
- Information Engineering/CASE Tools
- Software Applications Architecture and Development
- Commercial Off-The-Shelf (COTS) Software Customization
- GIS Applications Development
- GIS Implementation
- Database Design
- Systems Integration
- Software Maintenance/Sustainment

DATA MANAGEMENT AND USER SUPPORT

reVision's Data Management staff can assist clients in all aspects of data management to support day-to-day processes and production needs, including:

- Legacy Data Cleanup, Data Conversion, and Data Migration
- Database Administration
- Reporting
- Web Site Hosting & Maintenance
- Information Security
- Help Desk Support
- End User Training

ENVIRONMENTAL CAPABILITIES

reVision combines staff with deep and diverse environmental engineering experience with state-of-the-art data management and information systems tools. Specific capabilities include the following:

SITE INVESTIGATION

Whether the purpose of the investigation is due diligence or complex site characterization, reVision develops and implements streamlined characterization strategies, prepares dynamic work plans, and utilizes onsite analytical tools to minimize the time and cost required to characterize a site. Their due diligence investigations (e.g., Phase I/Phase II site assessments, Insurance underwriting, mergers and acquisitions) are designed to identify and quantify potential environmental risk; or characterization investigation focus is to characterize a site sufficient to identify and evaluate effective and prudent remediation/restoration approaches.

REMEDIATION/RESTORATION STRATEGIES

Whether it's under State or Federal regulatory programs, reVision has the experience in evaluating promising technologies needed to develop optimum remediation/restoration approaches, to successfully and economically achieve project cleanup objectives.

REMEDY DESIGN AND IMPLEMENTATION

reVision prepares drawings and develops specifications for groundwater containment systems, including deep collection trenches, slurry trench cut-off wells, groundwater pump-and-treat systems, water treatment systems for removal of metals, volatile organic compounds, nitrates and ammonia; caps and liners for landfills; liners for waste containment ponds; in situ treatment of dissolved and non-aqueous phase liquids, including soil vapor extraction, in-well stripper systems, and in situ chemical oxidation systems.

GEOTECHNICAL INVESTIGATIONS, EVALUATIONS, AND DESIGN

reVision staff members are experienced in conducting geotechnical investigations and evaluations to support siting studies, slope stability evaluations, slope failure evaluations and repair, embankment design, foundation design criteria for buildings, waterfront facilities, settlement and subsidence evaluations.

HYDROGEOLOGY & WATER RESOURCES

reVision hydrogeologists have experience in groundwater flow and transport modeling involving aqueous and non-aqueous inorganic and organic constituents; designing and implementing pilot-scale extraction tests, and statistically analyzing hydrogeochemical data. Their water resource specialists have experience at a variety of sites with flood routing and surface water profile models to quantify risk associated with flood events, surface water modeling, and design of sediment detention ponds and spillways.

PROGRAM MANAGEMENT

reVision project managers have the experience to successfully develop functional Work Breakdown Structures, generate timely project management information from which decisions regarding resource allocation, budget, and schedule can be made, and develop project management summary reports for clients with the contents and the format they require.

ENVIRONMENTAL AUDITING & PERMITTING

reVision assists companies in evaluating environmental compliance at federal, state, and/or local levels with the full spectrum of applicable environmental requirements with a restricted list of applicable environmental requirements at management and/or plant level. They work closely with their clients to determine the exact nature and scope of each audit. This includes deciding upon the specific laws and regulations to be reviewed; the level of scrutiny applied; and the facilities, operations, and areas to be audited. reVision staff has experience with audits the focus on the following areas:

- Hazardous Materials -- Emergency Planning and Community Right-to-Know (SARA Title III)
- Hazardous Waste -- RCRA Subtitle C
- Wastewater Discharges -- Clean Water Act
- Solid Waste -- RCRA Subtitle D
- Air Emissions -- Clean Air Act
- Safety and Health -- Occupational Safety and Health
- Asbestos -- Toxic Substance Control Act
- Polychlorinated Biphenyls -- Toxic Substance Control Act
